

10 Watt InvincibLED

Description:

Shooting pin sharp, laser-like beams of stunning colour, the special reflectors create a fast moving, constantly changing pattern that covers a wide area. Equipped with a high output 10 Watt RGBW LED, the unit projects beams through the 6 lenses allowing the InvincibLED to cover large areas of walls or ceilings. The unit also features a colour strobe effect to increase it's visual excitement. On-board DMX brings the extra dimension of allowing users to create their own programs with any standard DMX-512 controller.

Features:

- DMX channels: 1 or 3 selectable
- Sound active and master/slave modes
- Dipswitches
- Optional CA-8 controller
- 0-100% dimming and variable strobe (via DMX)
- IEC power input/output
- 3-Pin XLR input/output
- Convection cool

Specifications:

- Power supply: 100~240V, 50/60Hz
- Dimensions: 215 x 172 x 195mm
- Weight: 3.3kg
