

# SuperNova White

ILED-920D

**A revolution in compact moonflower effect lights. The SuperNova utilises a single 3 Watt high powered LED as its light source, producing laser like powerful beams of light.**

- **Unit occupies 2 DMX channels in DMX mode**
- **Built in lighting shows triggered by music, when operating in Sound Activation mode**
- **3 Operation Modes: DMX, Master/Slave, and Sound Activation**
- **Optional CA8 controller for instant lighting shows**
- **Advanced LED technology creating powerful light output comparable to a 250W discharge lamp**
- **Low heat, low power consumption, no duty cycle for continuous operation**
- **Very compact housing, perfect for discos, clubs, pubs, parties and mobile DJ's**
