LBC 1252/00 Wall Mounting Bracket

The LBC 1252/00 wall mounting bracket is actually designed for securing column loudspeakers directly onto a wall. It is made from die-cast aluminum, and includes two lockable swivel joints to allow movement in two perpendicular planes for precise positioning. The mounting hole pitch matches that of the threaded inserts in the back of most of the sound column enclosures.

Technical Specifications

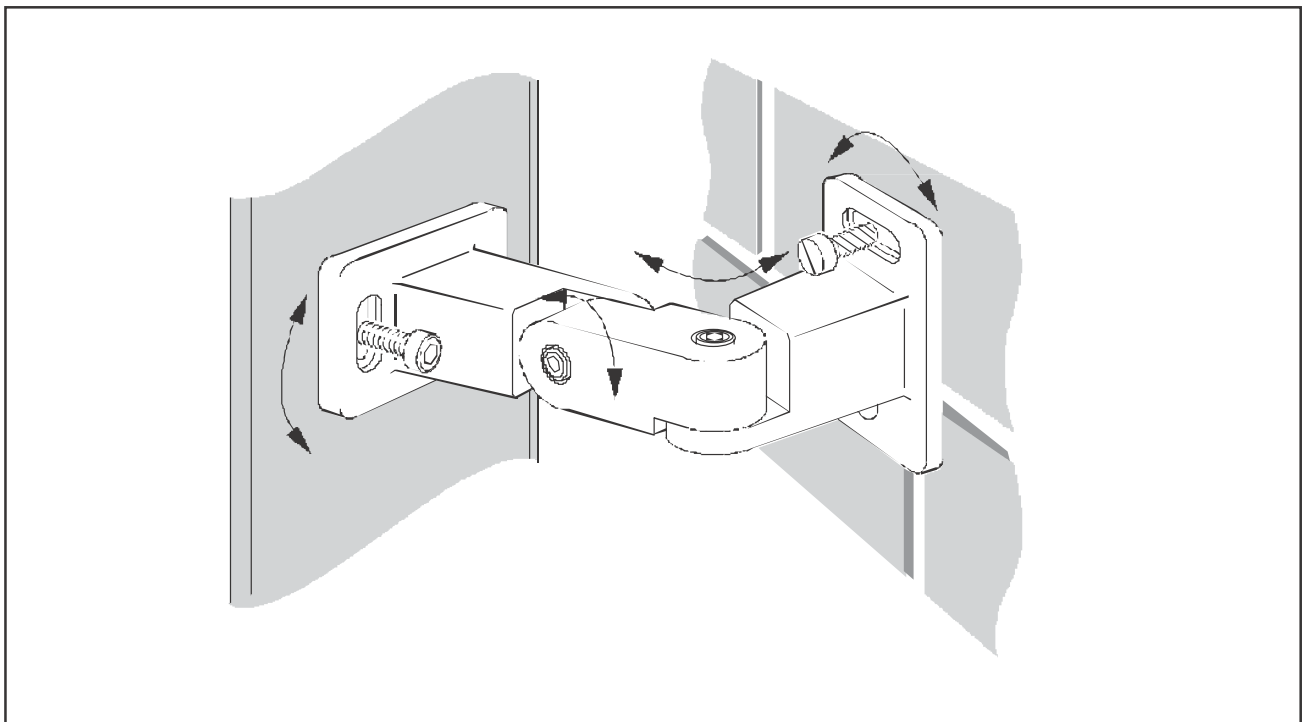

Mechanical

Approx. Dimensions	55 x 85 x 168 mm
Material	Die-cast aluminum
Finish	Glass-blast matt
Mounting Hole Pitch	65 mm
Mounting Hole Dia.	6 mm
Max. Load	10 kg
Weight	395 g
