AM6215/95 is a high power 2-way full-range loudspeaker system comprised of one 380 mm (15 in) VGC™ Vented Gap Cooled low frequency driver and one 38 mm (1.5 in) exit/75 mm (3 in) voice-coil compression driver. The large PT Progressive Transition waveguide provides well-controlled 90° by 50° coverage and is rotatable for cabinet positioning in either horizontal or vertical orientation. High-slope crossovers minimize band overlap and well-controlled off-axis response enhances arrayability.

The cabinet is fitted with M10 threaded suspension points. Optional U-bracket is available for easy installation.

AM6215/95 is part of JBL's AE Application Engineered Series, a versatile family of loudspeakers for a wide variety of fixed installation applications.
