

E SYSTEM¹⁵

Complete
Portable Sound
Reinforcement System

Application:

The E-System 15, featuring two EON15 G2 powered speakers, a Soundcraft E8 sound reinforcement mixer, and two AKG D2000S dynamic hypercardioid microphones, is a complete, integrated sound system intended for a wide range of applications in reinforcement of music and speech.

Key Features:

The E-System 15 is just that—a system. From the top manufacturers in the pro audio industry, each component has been selected to support and complement the others.

EON^{G2} JBL EON15 G2 Speakers

The second generation of one of the most successful and influential professional speaker systems ever.

- ▶ 15" Differential Drive™ low-frequency driver with dual neodymium magnet for light weight and reduced distortion.
- ▶ 1" (throat diameter) JBL compression driver with 1.75" titanium diaphragm and ferro-fluid cooling.
- ▶ 300 watts low-frequency and 100 watts high-frequency (bi-amplified)—actual power delivered to the drivers.
- ▶ Built-in 3-input mixer. One balanced mic/line input, two balanced ¼" phone line-level inputs. Two-band equalization.
- ▶ Balanced loop-through/mix output. "Daisy-chain" additional EON speakers or send the mixed output to a mixing console.
- ▶ 60° x 90° (nominal) constant directivity horn.
- ▶ Thermomaster® Total Thermal Management System®. A single piece, cast-aluminum baffle integrates woofer frame, horn, and amplifier heat sink. Air movement in the finned ports dissipates heat—no internal or external cooling fans are required.
- ▶ Rugged, light-weight, black co-polymer enclosure.
- ▶ Integral 35 mm pole mount receptacle with securing thumb screw.
- ▶ Multi-angle enclosure for front of house or stage monitor application.
- ▶ Tailored dynamic processing protects amplifiers and speakers from being over-driven without producing extreme changes in frequency response as level varies.
- ▶ Extended low-frequency performance. Delivers powerful bass to below 40 Hz.

E8 Mixer

- ▶ 8 mic/line input channels
- ▶ 2 stereo input channels
- ▶ Three-band channel EQ with variable mid-frequency for precise tailoring of the sound
- ▶ Precision, ultra-linear mic pre-amps
- ▶ Two auxiliary monitor or effects busses with pre/post settings
- ▶ True professional +48V phantom power
- ▶ Smooth 100 mm faders for precise control of your mix
- ▶ Individual channel mute switches so you can mute an input without disturbing your mix
- ▶ Internal power supply
- ▶ Simple rack mounting options (sold separately)

D2000S Microphones

Rounding out the system is a pair of AKG D2000S handheld, dynamic hypercardioid microphones. These microphones have been selected to do a great job in a variety of applications from speech and vocals to instrument pick up.

► E-System 15 Complete Sound Reinforcement System

A complete sound reinforcement system so good that no one company could build it all. Start with the second generation of the speaker that started the powered-speaker revolution—the JBL EON15 G2. Then add a Soundcraft E8 mixer with that great British sound and wide range of features. To complete the system, a pair of dynamic, hypercardioid microphones from AKG—the D2000S. Rounding out the system are four 25 ft XLR cables to hook it all together.
