

# XD-V35 Digital Wireless Handheld Microphone System

Pure 24-bit sound for active performers

- Precision microphone modeling technology
- Superior 24-bit, compander-free vocal reproduction
- 4th-generation Line 6 digital wireless platform
- One-step setup, portable desktop format

Line 6 XD-V35 sets a new standard in handheld wireless systems for performing vocalists, with the superior audio quality, simplicity and reliability of the company's proven, award-winning digital wireless platform.

Featuring exclusive microphone modeling technology, XD-V35 delivers a spectacular model based on\* the industry-standard Shure® SM58® microphone, combined with a proven 4th-generation digital wireless platform.

The signal from XD-V35 is so clear and strong that it sounds just like you're using a wired microphone. Unlike traditional analog wireless, there's no compression or expansion in the signal chain. The premium cardioid capsule captures your voice perfectly and the system transmits a full 10Hz – 20kHz frequency response and wide 115dB dynamic range, giving a huge amount of headroom for the clearest possible sound. Featuring six always-available channels, XD-V35 provides license-free operation worldwide and one-step setup, no need for RF tuning or intermodulation calculators.

Ensuring peace of mind and the most reliable performance, XD-V35 systems operate in the 2.4GHz band, which is free from interference due to TV broadcast, public safety announcements, cell phone towers and other transmitting devices. Encoded DCL™ (Digital Channel Lock) technology prevents reception of any audio interference from other 2.4GHz devices and ensures signal integrity.

It all combines to transmit every nuance of your performance with no degradation in quality across the entire 275-foot (83-meter) range.

# XD-V35 Digital Wireless Handheld Microphone System

Pure 24-bit sound for active performers

## Features

- Professional digital wireless system for performing vocalists
- License-free operation worldwide
- Accurate and precise vocal reproduction with full-range 10Hz – 20kHz (-2.5dB) frequency response, wide 115dB dynamic range (A weighted), superior transient response, and 24-bit digital conversion
- Proven 4th-generation digital wireless technology surpasses analog wireless systems in wireless reliability and sound quality
- 2.4GHz band operation, free from interference due to TV broadcast, white space devices, and cell phone towers
- Six always-available channels
- 275-foot / 83-meter range – 10 feet away or 200 feet away, you get full-quality audio (Note: actual range will depend on RF interference sources nearby including, line-of-sight obstacles)
- One-step setup
- Premium dynamic microphone capsule – with cardioid polar pattern
- Road-ready polycarbonate microphone transmitter and receiver chassis
- FCC compliant; immune to the FCC Consumer Alert regarding wireless microphones
- System includes microphone transmitter, desktop receiver, two AA alkaline batteries

## Specifications

Part Number	99-123-0505
UPC	614252990219
Case Pack	2
Case Pack Size	11.1" H x 7.79" W x 15.34" L
Case Pack Weight	7.2 lbs.
Display Box Size	3.54" H x 10.43" W x 14.47" L
Display Box Weight	3.5 lbs.
